AED												
▪ AED Pads present and in good condition												
▪ Adult (in date)												
▪ Child (in date)												
▪ Battery												
▪ Prep Razor												
▪ Pocket Mask/Faceshield												
▪ Wall Cabinet Alarm												

AED Monthly Maintenance Check List

- 1) Ensure that is at least ONE (1) set of Adult AED pads and ONE (1) set of child pads in the AED
 - a. Be sure that the pads have not expired. If expired or within 1 month of expiring be sure to order new pads.
- 2) Ensure that the battery is fully charged (if it is not, either replace it or re-charge it per the manufacturers instructions)
- 3) Ensure that there is a prep razor included with the AED
- 4) Ensure that there is a Pocket Mask or other barrier device with the AED
- 5) Ensure that the alarm works on the cabinet (if AED is stored in an alarmed cabinet)

This checklist is designed to help you ensure that your AED will always be ready when you need it most. If you have questions about AED's or how to implement a maintenance program we are happy to help.

Want help getting your school staff certified in CPR?

As a non-profit based, public health education program, **CPR Safe™** is a school-friendly project that works with schools in NH to make CPR and child safety a priority.

For more information or assistance in getting a CPR program started in your school contact us at:

862-3674
