## CPR Safe School Nomination Form

**As a non-profit based public health education program, CPR Safe™ is a school-friendly project that works to attain the following three goals in every NH school:**

- The school has made child health and safety a priority through staff professional development, day to day operations, student wellness education, and CPR certifications.
- At least 75% of the school staff are certified in Adult, Child, and Infant CPR and have been trained in the use of an Automatic External Defibrillator (AED).
- The school is equipped with an AED, which is easily accessible.

**McGregor Memorial EMS will certify schools meeting these criteria as CPR Safe™.**

**CPR Safe certification is free to your school if you meet the above criteria.**

The **CPR Safe™** certification lets your staff, students, parents and community know of your accomplishment by recognizing your school's commitment to children's health and safety and ultimately makes the school and community a safer place for all.

**Instructions: To nominate your school please fill in your answers to the questions below. When finished, mail the completed form, along with any other accompanying documents, to McGregor EMS, Attn: CPR Safe Certification. If you have any questions about the above information please contact me. Once we have received your nomination form we will evaluate it to ensure that all criteria have been met. Upon successful evaluation, you will be contacted to let you know you are a CPR Safe school and a certification presentation will be arranged along with a press release recognizing your school.**
